UNIVERSAL STUD BRACKET

The Rough-in Ready Universal Mounting Bracket. Our SBRNR bracket is a big part of the Rough-in Ready system, the SBRNR is full of useful features that sets it apart from other Brackets on the market.

- It can be mounted to either the left or to the right side of the stud
- It has an offset to ensure there is no dimpling to the drywall
- It has far side support for up to a 6" deep wall cavity to hold the assembly in place
- It includes cable support for 3 MC cables to meet the code requirement for support
- It can be adapted with spanner bars to give the ability to position the assembly within the 16" or 24" wall cavity
- Can be mounted to our kickstand to be positioned up 18" off the floor consistently

The SBRNR can be part of our engineered system, part of our cable ready assemblies or can be purchased as the bracket only.
